

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-10 (Canceled).

11. (New) An interior trim component having an outer surface manufactured by using a two-shot molding technique, comprising a first portion made of a first, rigid material, and a second portion made of a second, flexible material covering a portion of said first material and including one or more switch elements; and a circuit assembly in communication with said one or more switch elements, wherein actuation of said one or more switch elements actuates said circuit assembly.

12. (New) The trim component according to Claim 11, wherein said first, rigid material forms a relatively harder plastic material when cured, and wherein said second, flexible material forms a relatively soft-touch plastic material when cured.

13. (New) The trim component according to Claim 12, wherein the first material is in a reactive state to integrally form said second portion with said first portion of said trim component.

14. (New) The trim component according to Claim 11, wherein first material has a different color than the second material.

15. (New) The trim component according to Claim 11, further comprising a cover applied over the second portion.

16. (New) The trim component according to Claim 15, wherein said cover includes integrally formed identifying markings.

17. (New) The trim component according to Claim 15, further comprising a foam layer disposed between said cover and said second portion.

18. (New) The trim component according to Claim 11, wherein said circuit assembly includes a plurality of contacts in electrical communication with a plurality of terminals.

19. (New) The trim component according to Claim 11, wherein said trim component comprises a bezel and switch component and is integrated into an armrest.
